## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s)1-2, 9-10 drawn to a equipment for transforming plants and a method of transforming plants using said equipment.

**Group II**, claim(s) 3-8 and 16-20, drawn to a system for transforming plants.

**Group III**, claim(s)11-13 drawn to a method of transforming plants using said system.

**Group VI**, claim(s)14, drawn to a method for selecting plants harboring a heterogeneous gene.

**Group V**, claim(s) 15, drawn to a method for selecting plants harboring a heterogeneous gene.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I and II are distinct product as the equipment of Group I comprises one microporous body and a carrier solution whereas the system of Group II comprises multiple microporous bodies and a holding means for removably holding the microporous bodies. They are structurally different.

Methods of Groups III-V are different because they differ in starting materials used, method steps and resulting products.

According 37 C.F.R. §1.475 (d), if multiple products, process of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered as the main invention in the claims. In the instant case, Group I is the main invention. Other products and methods of use are considered lack of unity.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
